

OUR TECHNOLOGY

Krueger Winery Technology, LLC (Krueger Wine Tech) was founded as a systems integration company to provide innovative processing and packaging solutions to the wine and beverage industries in the United States. To that end, Krueger Wine Tech has established partnerships and alliances with numerous leading European manufacturers of winery equipment and supplies. Every one of Krueger's partner companies enjoys a world-wide reputation of unsurpassed design and engineering excellence coupled with superior product quality and top-notch service to the customer.

Due to the ever increasing dengineering excellence coupled with superior product quality and top-notch service to the customer.

Due to the ever increasing demand for alternative closures in the wine industry, the main focus of Krueger Wine Tech soon turned to screw cap closures and the respective capping machines, capping heads and bottling line automation.

In 2006, Krueger Wine Tech partnered with MALA Verschluss Systeme, GmbH, a European manufacturer of high quality screw caps for wines and spirits. A medium sized, family run business, MALA has made a name for itself worldwide due tys a world-wide reputation of unsurpassed design and engineering excellence coupled with superior product quality and top-notch service to the customer.engineering excellence coupled with superior product quality and top-notch service to the customer.
